

Dr Andrew Kelly
Executive Director, BioPacificVentures

Dr Andrew Kelly is one of Australia-New Zealand's most experienced biotech investment managers. He is a co-founder of BioPacificVentures, the \$100 million venture capital fund specialising in health and wellness, including food & nutrition, health maintenance and the prevention and treatment of chronic disease. The fund has completed 11 investments to date across Australia and New Zealand.

Prior to BioPacificVentures, Andrew managed seed funds in early stage technology development. However, the first 20 years of Andrew's career were in science. This included Science General Manager at AgResearch New Zealand, Director of Rutherglen Research Institute in Victoria, Director of the Pastoral & Veterinary Institute in Victoria, and both MSc and PhD degrees in veterinary science.

His move to the dark side caught him unawares.
