

**Dr Andrew Walter**  
**Operations Manager, Walter Farming**

National University.

Walter Farming is an extensive broad acre farming and agricultural contracting business with farms and clients extending from central Queensland to Victoria and South Australia.

Walter Farming is involved in all aspects of broad acre crop production, from planting the seed and managing the agronomy through to harvesting and marketing the crop.

Walter Farming has a track record of achievement in the development of new farming systems and agricultural machinery.

Andrew completed a PhD in Plant Molecular Science at CSIRO Plant Industry and the Australian

He has held a number of senior positions in agribusiness enterprises throughout the world and has been the Coach of the Australian Biology Olympiad Team and Director of the International Biology Olympiad.

His passion for excellence in science and farming is now combined in his role in the family agricultural business.
