

Dr Arthur Brandwood
Managing Director
Brandwood Biomedical Pty Ltd

Arthur Brandwood has over 20 years experience in the medical technology field in industry, academia and government including responsibilities as Director of Devices Registration and of the Biomaterials and Engineering laboratories at the Australian Therapeutic Goods Administration (TGA).

He is principal of Brandwood Biomedical Pty Ltd, providing specialist technical, quality and regulatory services supporting whole of product life cycle to medical device and diagnostic companies.

Arthur is also a Director of DevDx Clinical, a newly formed Clinical Research Organisation servicing the devices and diagnostic sectors.

Arthur's comprehensive and up to date knowledge of regulatory and clinical evidence requirements combined with a strong working relationship with key regulators in Australia, Europe, the US and SE Asia has led to a strong track record of successes for both start up ventures and well established corporations.

He is a visiting Professor in Biomedical engineering at the University of Sydney and has lectured widely on regulatory affairs and medical device testing and development. He has served as the accredited Australian expert to several international medical device standards committees, including ISO 14155-Clinical Investigation of Medical Devices for Human Subjects and as chair of the ISO committees on Tissue Engineered Medical Products and on Implant Tracking.
