**Elliot Parks
President & CEO
Hawaii Biotech Inc**

D. Elliot Parks, Ph.D., is Managing Director with Hamilton BioVentures and President and CEO of Hawaii Biotech Inc.

With over 25 years in the life science industry, including research, product development, executive management, and international venture capital, he has extensive experience successfully translating biomedical science into commercial products.

He has been an institutional venture capital fund manager as Managing Director with Hamilton BioVentures and Ventana Capital Management's life science venture practices.

Dr. Parks has worked closely with international investors from Asia, Europe,

North and South America.

A well-known figure in the biotechnology community, Dr. Parks has served in key leadership positions in academic research at the Scripps Research Institute, in product development and commercialization at Johnson & Johnson, and as a CEO at Myelos Neurosciences, in addition to his venture capital experience.

He currently serves on several private and public boards and advisory groups including the Hawaii Biotech, BIOCUM, the Hawaii Science and Technology Council, HiBEAM, and the Queensland North American Biotechnology Advisory council.

Dr. Parks earned his Doctorate in cellular and molecular biology at the University of Washington, and trained under the Surgeon General of the U.S. Army and at The Scripps Research Institute.
