The Host Body – AusBiotech Ltd

AusBiotech 2009 is owned and managed by AusBiotech Ltd, the Australian Biotechnology Organisation. AusBiotech is the national body for the biotechnology and life sciences industry in Australia, and has amongst its members companies and organisations from industry, entrepreneurs, manufacturers, investors, research institutes and governments. AusBiotech provides a vibrant and energetic framework that brings together all the relevant participants in the Australian biotechnology community.

The Components of AusBiotech 2009

AusBiotech is pleased to announce that AusBiotech 2009 will have four components, as part of a consolidated meeting. The four components are:

- **Conference**, with a program extending over three days with plenary and concurrent sessions;
- **BioIndustry Exhibition**, where exhibitors have the opportunity to physically promote products and services in a professionally presented and marketed exhibition display area. This area is also the venue for most network functions and event catering, such as morning/afternoon teas and lunches;
- **Business Matching Program**, giving delegates the opportunity to update their company profile in the biopartnering system and request appointments with other delegates/company representatives attending the event in a meeting room atmosphere on an half hour or hourly basis; and
- **Satellite Events**, where companies will have the opportunity to cooperatively partner with AusBiotech and provide delegates and the industry with one-on-one and specifically focused seminars and workshops.
