

Dr Fred Davis
Managing Director
Invetech

Fred commenced his career in research, receiving a PhD in Mechanical Engineering from Bristol University (UK).

Joining Invetech in 1989 as a product development design engineer, Fred later worked in project leadership, design management, sales and marketing and business management.

As Invetech's Managing Director, Fred now leads an international group of 200+ engineers, industrial designers and scientists, with offices in

Melbourne, San Diego and Zurich.

Today Invetech earns more than \$70M a year from providing an innovation-focused new product development consulting, contract manufacturing and custom automation service.

Exports account for 90% to 95% of revenue. 75% of Invetech's business is for biotech and medical clients (focusing on medical devices, diagnostics and life sciences).

The balance of Invetech's business is for leading international industrial and consumer product clients, with a special focus on Cleantech (solar and water).
