

Jeffrey Castellanos. CEO Clean Technology AustralAsia

Jeffrey is the co-founder of Clean Technology AustralAsia Pty Ltd and the Cleantech Forum events in Australia and India. He has developed a global network of leading decision makers that he has brings together for knowledge exchange and commercial interaction. He is a successful entrepreneur of clean technology companies and is a recognised expert in cleantech market

opportunities and investment risks.

Jeff is the Chair of the Australian Cleantech Advisory Group of companies that provide Corporate Advisory and Investment Services to technology companies and funds raising capital, seeking JV partnerships and deploying clean technologies into growth markets, particularly in India. He is also the Chair of the Cleantech Investment Showcase committee that selects the most promising companies to be presented to sophisticated investors.

Jeff has been a consultant to industry and government on sustainability policy, strategic planning and economic

development initiatives for over 20 years. He is leading the growth of the Victorian Cleantech Industry in a Sustainability Covenant with the State government. Jeff is presently engaged to make recommendations to the Asia-Pacific Partnership on Clean Development and Climate (APP) that brings together Australia, Canada, China, India, Japan, Korea and the United States to address the challenges energy security, air pollution and climate change to encourage economic development and reduce poverty.

Jeff has held senior executive and Board positions of leading companies in Australia and North America such as Innovest Strategic Value Advisors (Aust), Carmanah Research and 4D Models Technology. He has a Bachelor of Applied Science degree from Deakin University, Melbourne and a Masters Degree in Sustainability Performance Measurement from Royal Roads University, Canada.
