Jennifer Hanneschlager is a managing director in the Washington, DC office. She focuses on biodefense and public health preparedness. Specific areas of interest include emerging infectious diseases, advanced purchase agreements and global health markets, the Select Agent and Toxins regulations, and dual-use technologies.

Jennifer has more than twelve years of experience working with companies, universities, and non-governmental organizations in London, Peru, Trinidad, Venezuela, and the United States. Most recently, Jennifer was a senior researcher with Thomson Medstat, a national healthcare intelligence and research company. While there, she was involved in the implementation and evaluation of epidemiological studies. Jennifer has extensive experience working in the areas of infectious disease control and policy, vector/virus interactions and viral transmission patterns

Jennifer received her Ph.D. in biology from the University of Notre Dame, where she was a member of the Departmental Honesty Committee and the Graduate Student Mentorship Development Committee. She received her M.P.H. in epidemiology and international health from the University of Michigan. Jennifer did her undergraduate studies at the University of Kansas, earning a B.A. in biology and a B.S.E. in community health education.
