

Michael E. Greenberg, MD, MPH
Director of Clinical Development for Vaccines
CSL

Dr. Greenberg began his medical career as a paediatrician following training at the University of California, San Francisco where he subsequently joined the academic faculty. After moving into a public health role in the San Francisco Bay Area, he pursued a second qualification in Public Health and Preventive Medicine with a specialization in epidemiology.

Following experience in a local health department, Dr. Greenberg moved to Atlanta where he served as an Officer in the Epidemic Intelligence Service at the Centers for Disease Control and Prevention. His work at CDC focused on sexually transmitted infections as well as influenza.

Dr. Greenberg joined GlaxoSmithKline Biologicals in Rixensart, Belgium in 2005 as an epidemiologist where he conducted research in several areas of infectious disease, with an emphasis on both seasonal and pandemic influenza.

Dr. Greenberg joined CSL in 2009 as Director of Clinical Development for vaccines. He has published in international peer-reviewed medical journals and presented at congresses worldwide, most recently describing the results of CSL's pandemic H1N1 influenza vaccine in the *New England Journal of Medicine*.
