Rens Scheepers
Associate Professor
Department of Information Systems
The University of Melbourne

Rens Scheepers is an Associate Professor in the Department of Information Systems, at the University of Melbourne. In his research, he focuses on approaches to assess the potential value that emerging information technologies (such as mobile technologies) hold in the individual, organisational and societal context.

He has examined value returns and impact on service delivery of a variety of emerging information and communication technologies in sectors such as manufacturing, consulting, policing, aged care, banking, hospitality and health care.
